

NuTone[®] AD500 Telephone Entry and Access Control System

Ideally suited for apartments, condominiums, dormitories, hospitals, office buildings and other commercial locations, the Model AD500 Telephone Entry System allows full access control of one or two entryways.

Telephone Entry and Access Control System

Housed in a locked, rugged stainless steel faced enclosure, this Entry System features a side-lit 12-key telephone style keypad with bright, easy-to-read graphics. The backlit two-line directory presents a programmable welcome message, and a built-in microphone and speaker. The system is telephone based. No extra wiring! Answering the door is as simple as picking up a telephone.

- Rugged 16 gauge brushed stainless steel front panel
- Backlit, two-line directory features a programmable welcome message
- Easy to use built-in, scroll through directory
- Bright, easy-to-read 12-key telephone style keypad
- Built-in microphone and speaker
- Two relay output channels can be programmed to control entryway door locks or barrier gates
- System boasts a 250 resident capacity, while allowing access using up to 500 distinct entry codes!

Easy and Safe Operation

Two relay output channels are programmed to control electric door strikes, magnetic locks or barrier gates. Once contact is made, communications are hands-free!

- Unit memory is programmed with each resident's name and directory code
- Visitors use the keypad to scroll through for the desired resident
- Upon entry of the directory number, the system dials the resident's phone number to establish contact
- The resident may grant or deny access by pressing a digit on the phone

Convenient Programming Options

Access codes can be entered through the keypad located on the front of the AD500, or you may choose to program the directory using a TouchTone™ phone. Simply enter the access codes using the telephone keypad.

If you need to be off-site for an extended period, you can program the AD500 using a computer! All you need is a modem to connect to the Internet and your favourite Web browser. Navigating through the system programming "pages" is simple and intuitive.

- Local programming using the keypad
- Remote programming using a Touch-Tone™ phone
- Remote programming using a computer modem and telephone line

Flush Mount Installation

- Use one AD500 Entry/Access System

Recess Mount Installation

- Use one AD500 Entry/Access System, plus add an IRAD500 Trim Ring rough-in, sold separately.

Safe. Simple. Convenient.

Make life easy with a
NuTone® Telephone Entry System.
